
Enriched Term
axonogenesis
axon guidance
neuron projection morphogenesis
regulation of secretion
cell projection morphogenesis
neuron projection development
plasma membrane bounded cell projection morphogenesis
cell morphogenesis involved in neuron differentiation
secondary metabolic process
positive regulation of secretion
sensory system development
regulation of secretion by cell
eye development
exocytosis
gland development
visual system development
tissue morphogenesis
synapse assembly
camera-type eye development
positive regulation of secretion by cell
regulation of neuron projection development
neurotransmitter transport
morphogenesis of an epithelium
limb development
appendage morphogenesis
limb morphogenesis
protein localization to extracellular region
neurogenesis
telencephalon development
synaptic transmission, cholinergic
regulation of microtubule cytoskeleton organization
limb development
appendage development
dense core granule localization
dense core granule exocytosis
axonogenesis
regulation of neuron differentiation
regulation of system process
regulation of hormone levels
regulation of nervous system development
cerebral cortex cell migration
secretory granule localization
neuron migration
regulation of plasma membrane bounded cell projection organization
regulation of cell projection organization
cell development
actomyosin structure organization
cartilage development
response to steroid hormone
circulatory system process
connective tissue development
axonogenesis
cerebral cortex radially oriented cell migration
positive regulation of nervous system development
peptide hormone secretion
neuropeptide transport
negative regulation of cell differentiation
signal release from synapse
synaptic vesicle transport
calcium-ion regulated exocytosis
synaptic vesicle cycle
glial cell differentiation
locomotory behavior
amylase secretion
neuron development
cell junction assembly
establishment of protein localization to extracellular region
tissue morphogenesis
neural precursor cell proliferation
muscle structure development
anatomical structure homeostasis
cell migration
regulation of cardiac muscle contraction
regulation of synapse structure or activity
GO:BP
cell–cell junction
axon
neuronal cell body
dendrite
growth cone
site of polarized growth
synaptic membrane
postsynaptic membrane
glutamatergic synapse
extracellular matrix
external encapsulating structure
collagen-containing extracellular matrix
muscle thin filament tropomyosin
dendrite
dendritic tree
actin cytoskeleton
excitatory synapse
basement membrane
axon
axonal growth cone
microtubule
cell–cell contact zone
transport vesicle membrane
cell leading edge
contractile muscle fiber
collagen-containing extracellular matrix
presynaptic membrane
growth cone membrane
stress fiber
contractile actin filament bundle
monoatomic ion channel complex
synaptobrevin 2–SNAP–25–syntaxin–3–complexin complex
GO:CC
actin binding
extracellular matrix structural constituent
actin filament binding
tubulin binding
structural molecule activity conferring elasticity
microtubule binding
neurotransmitter receptor activity involved in regulation of postsynaptic membrane potential
neurotransmitter receptor activity
postsynaptic neurotransmitter receptor activity
GO:MF
MAPK signaling pathway
Cardiac muscle contraction
Hypertrophic cardiomyopathy
Dilated cardiomyopathy
Glutamatergic synapse
Synaptic vesicle cycle
Calcium signaling pathway
Alanine, aspartate and glutamate metabolism
Serotonergic synapse
GABAergic synapse
Retrograde endocannabinoid signaling
KEGG
Nicotine effect on dopaminergic neurons
Synaptic vesicle pathway
ADHD and autism ASD pathways
MF

Enriched Term
axonogenesis
axon guidance
neuron projection guidance
positive regulation of secretion
sensory system development
eye development
exocytosis
gland development
visual system development
forebrain development
camera-type eye development
positive regulation of secretion by cell
regulation of neuron projection development
neurotransmitter transport
ear development
limb morphogenesis
appendage morphogenesis
limbic system development
protein localization to extracellular region
neurogenesis
telencephalon development
synaptic transmission involved in micturition
regulation of microtubule cytoskeleton organization
lung development
appendage development
dense core granule localization
dense core granule exocytosis
amide transport
regulation of neuron differentiation
regulation of neurogenesis
regulation of nervous system development
regulation of axonogenesis
cerebral cortex cell migration
secretory granule localization
muscle system process
inner ear development
actomyosin structure organization
peptide transport
cartilage development
response to oleic acid
connective tissue development
olfactory lobe development
cerebral cortex radially oriented cell migration
positive regulation of nervous system development
peptide hormone secretion
hormone transport
signal release from synapse
neurotransmitter secretion
calcium-ion regulated exocytosis
synaptic vesicle cycle
glial cell differentiation
locomotory behavior
protein secretion
peptide secretion
pallium development
establishment of protein localization to extracellular region
tissue homeostasis
neural precursor cell proliferation
muscle contraction
anatomical structure homeostasis
telencephalon cell migration
regulation of cartilage development
regulation of synapse structure or activity
GO:BP
growth cone
site of polarized growth
synaptic membrane
distal axon
postsynaptic membrane
GABA-ergic synapse
muscle thin filament tropomyosin
excitatory synapse
basement membrane
myofibril
axonal growth cone
T-tubule
cell-cell contact zone
transport vesicle membrane
sarcolemma
contractile muscle fiber
collagen-containing extracellular matrix
presynaptic membrane
growth cone membrane
stress fiber
contractile actin filament bundle
monoatomic ion channel complex
specific granule
synaptobrevin 2-SNAP-25-syntaxin-3-complexin complex
GO:CC
actin binding
extracellular matrix structural constituent
actin filament binding
tubulin binding
structural molecule activity conferring elasticity
microtubule binding
neurotransmitter receptor activity involved in regulation of postsynaptic membrane potential
neurotransmitter receptor activity
postsynaptic neurotransmitter receptor activity
GO:MF
MAPK signaling pathway
Cardiac muscle contraction
Hypertrophic cardiomyopathy
Dilated cardiomyopathy
Glutamatergic synapse
Synaptic vesicle cycle
Circadian entrainment
Alanine, aspartate and glutamate metabolism
Serotonergic synapse
Nicotine addiction
GABAergic synapse
Retrograde endocannabinoid signaling
KEGG
Nicotine effect on dopaminergic neurons
Synaptic vesicle pathway
ADHD and autism ASD pathways
